

Qualified Energy Performance Narrative

Comparative public-impact narrative: Do not use as a confident public claim without additional review, source support, and narrowed language.

Claim

The pilot may have reduced energy use, but attribution remains uncertain and affordability effects require further review.

Narrative risk

****Score:** 71 • ****Level:** High****

Flags

- High uncertainty should be stated explicitly
- Narrative may be changing quickly
- Stakeholder pressure may be influencing interpretation
- High-consequence claim needs stricter review

Evidence

Coverage: partial; 2 sources; 2 independent sources; 2 evidence items.

Governance

Status: approved; final disposition: approve_with_conditions; publication allowed: yes.

Disclosures

- Scenarios are explicit assumption tests and do not certify truth.
